Thank you for contacting the Structural Pest Control Section of the Georgia Department of Agriculture concerning your problem with wood destroying organisms. The Department of Agriculture provides a free inspection service for wood destroying organisms to Georgia consumers under the following conditions:

- 1. If a structure is under a current contract with a licensed pest control company for the control of wood destroying organisms such as termites, wood boring beetles or wood decaying fungi.**
- 2. If a structure has been treated for a wood destroying organism by a licensed pest control company within the last 5 years or the contract has expired within the last two years, whichever is longer.**
- 3. If there is a conflict of opinions between two licensed pest control companies.**

If you meet the above noted conditions and would like to arrange for a Department of Agriculture field agent to inspect your structure, please complete the "Request for Inspection" form and mail it or FAX it as listed below. You may also email this information to Inspection@agr.state.ga.us

After receipt, your request will be assigned to a field agent. The field agent will then contact you to arrange for the inspection. Since our business hours are weekdays between 8:00 a.m. and 4:30 p.m., all inspections should be completed no later than 4:30 p.m. Department inspectors do not work on weekends or holidays. All requests for inspection are handled on a first come first serve basis.
